

INVARA LABS

PROPOSAL

[ENGAGEMENT TITLE]

Prepared for [CLIENT ORGANISATION]

Prepared for	[Client sponsor and organisation]
Prepared by	Madhukumar Rajanala, Founder Invara Labs
Proposal date	[DD Month YYYY]
Valid until	[DD Month YYYY]
Proposal ID	[IL-PROP-YYYY-NNN]

Engineering First. AI Enabled. Business Focused.

This proposal is confidential and intended only for the named recipient. Scope, timing, and fees remain subject to written agreement.

1. Executive Summary

CLIENT DECISION *Describe the decision or business outcome this engagement must enable.*

[Summarise the client situation, why it matters now, the proposed engagement, and the outcome the client should expect. Keep this to 150-200 words and avoid repeating the entire proposal.]

Proposed engagement

SELECT ONE *Engineering Excellence Assessment / Modernisation Accelerator / AI Engineering Adoption Sprint / Custom approved engagement*

Primary outcome	[Decision, evidence, or capability the client will receive]
Duration	[Start date] to [End date] / [N weeks]
Fixed fee	[Currency] [Amount], excluding applicable taxes
Client sponsor	[Name and title]
Invara lead	Madhukumar Rajanala, Founder

2. Client Context and Success Measures

Current situation

TAILOR *State observed facts, known constraints, urgency, and relevant prior decisions. Separate evidence from assumptions.*

Objectives

- [Objective 1: decision or outcome, not an activity]
- [Objective 2]
- [Objective 3]

Success measures

Measure	Baseline	Target / evidence	Owner
[Measure 1]	[Current]	[Expected evidence]	[Owner]
[Measure 2]	[Current]	[Expected evidence]	[Owner]
[Measure 3]	[Current]	[Expected evidence]	[Owner]

3. Scope and Approach

In scope

- [System, product, team, repository, or process boundary]
- [Assessment lens or workstream]
- [Stakeholder group and agreed evidence]

Out of scope

- [Explicit exclusion]
- [Explicit exclusion]
- Any work not listed in this proposal unless approved through change control.

Delivery approach

#	Phase	Purpose
1	Qualify	Confirm the decision, scope, stakeholders, access, and evidence.
2	Discover	Review context, systems, artefacts, and constraints.
3	Analyse	Test assumptions and identify material findings or options.
4	Decide	Present trade-offs and a sequenced recommendation.
5	Enable	Transfer agreed artefacts, decisions, and knowledge.

4. Deliverables and Acceptance

Deliverable	Contents	Format	Acceptance evidence
[Deliverable 1]	[Included content and boundary]	[PDF / workshop / repository]	[Review criterion]
[Deliverable 2]	[Included content and boundary]	[PDF / workshop / repository]	[Review criterion]
[Deliverable 3]	[Included content and boundary]	[PDF / workshop / repository]	[Review criterion]
[Deliverable 4]	[Included content and boundary]	[PDF / workshop / repository]	[Review criterion]

Acceptance process

The client will review each deliverable against the acceptance evidence above within [five] business days. Consolidated factual corrections will be addressed within scope. A deliverable is accepted when the client confirms acceptance in writing or the review period expires without a documented material non-conformance.

5. Schedule and Governance

Week / date	Activity	Output / decision	Participants
[Week 1]	[Activity]	[Output or gate]	[Roles]
[Week 2]	[Activity]	[Output or gate]	[Roles]
[Week 3]	[Activity]	[Output or gate]	[Roles]
[Week 4]	[Activity]	[Output or gate]	[Roles]

Governance

- Working cadence: [e.g., two 30-minute checkpoints per week].
- Decision authority: [Client sponsor] for scope, access, and acceptance.

- Escalation: material blockers or risks are raised within one business day.
- Status: concise written update covering progress, decisions, risks, and next actions.

6. Roles and Responsibilities

Role	Invara Labs	Client
Engagement lead	Lead delivery, analysis, recommendations, and reporting.	Provide sponsor and timely decisions.
Subject-matter access	Identify evidence required and facilitate focused review.	Provide agreed people, systems, artefacts, and constraints.
Quality and accuracy	Distinguish findings, assumptions, and professional judgement.	Review factual accuracy without controlling independent conclusions.
Security and confidentiality	Use approved access and protect client information.	Define policies, restrictions, and authorised access.
Adoption and ownership	Deliver handover and knowledge transfer.	Assign owners and decide whether to act on recommendations.

7. Fees and Payment

Item	Fee	Invoice point	Payment due
[Engagement / phase]	[Currency] [Amount]	[On signature / milestone]	[N days]
[Optional item]	[Amount]	[If approved]	[N days]
Total professional fees	[Amount]		
Taxes / expenses	[State treatment: taxes additional; pre-approved travel billed at cost; or not applicable]		

Invoices are payable according to the schedule above. Work may pause when an undisputed invoice is materially overdue. Any pricing change requires written approval.

8. Assumptions, Dependencies, and Change Control

Assumptions and dependencies

- The client provides timely access to agreed stakeholders, systems, repositories, and documentation.
- The client identifies security, privacy, legal, procurement, and policy constraints before access is granted.
- Dates depend on stakeholder availability and the quality and completeness of supplied evidence.
- Recommendations are based on the agreed scope and evidence available during the engagement.

Change control

Either party may request a scope change. Invara Labs will document the requested change, reason, effect on fees and schedule, and approval required. No changed work begins until both parties approve it in writing.

Key exclusions

- Legal, regulatory, privacy, compliance, or security certification unless explicitly contracted.
- Production implementation, remediation, or operational support not listed in scope.
- Guaranteed savings, delivery acceleration, risk elimination, or business outcomes.
- Third-party licences, tools, cloud usage, and vendor fees unless expressly included.

9. Commercial Terms

Confidentiality

Each party will protect confidential information under the applicable NDA or services agreement.

Intellectual property

Client-specific deliverables and pre-existing Invara Labs materials will be treated as defined in the governing agreement. Reusable methods, templates, and know-how remain subject to agreed licence terms.

Use of AI

AI-assisted work, if used, follows agreed data-handling restrictions and human verification. Client confidential information will not be submitted to unapproved tools.

Warranty and liability

The governing agreement controls warranties, liability, indemnities, and remedies. This template does not replace legal review.

Termination

Either party may terminate according to the governing agreement. The client pays for approved work completed and committed non-cancellable costs through termination.

Order of precedence

The signed services agreement and statement of work control over this proposal if terms conflict.

LEGAL REVIEW Replace this section with counsel-approved terms or reference the executed MSA/SOW before sending.

10. Approval

By signing below, the parties confirm the engagement scope, deliverables, responsibilities, schedule, fees, and referenced commercial terms. This proposal becomes effective only when signed by authorised representatives of both parties.

FOR [CLIENT ORGANISATION]	FOR INVARA LABS
Authorised signature: _____	Authorised signature: _____
Name: _____	Name: _____
Title: _____	Title: _____
Date: _____	Date: _____

Next step: return the signed proposal and confirm the engagement start date, client sponsor, and access coordinator.
